

Whose 'Money Voice' Can I hear?

This is something for you to do:

Get your bank statement – go through it and see what requirements you are paying for.

Specifically requirements – gas, electricity... insurance, phone – those sorts of things

Things you have to have to have.

Until you find one where... you haven't changed supplier in a while.

Ask why you haven't? – the answer will be.

Time... you hadn't thought about it... it's too much hassle.

Now ask – whose voice can I hear?

The voice has charge over your unconscious programming.

"It's too much hassle to think about,... life's too short"

"I haven't got time, it's convenient to keep it the same"

"If it were that much cheaper to change it, the supplier would have told me"

What's the unconscious instruction? – do nothing

Whose behaviour in your life was mostly to do nothing – not to change something?

Especially... something they don't immediately understand?

Whose responsibility is it to change something? – see what the conditioning tells you.

Now you know the voice – you can change it
