

TERRY

CUTLER

THE ETHICAL HACKER

MEDIA KIT - 2021

ABOUT **TERRY CUTLER**

Terry Cutler is the CEO of Cyology Labs and the author of the #1 Amazon Best Selling book "**Insider Secrets to Internet Safety: Advice from a Professional Hacker**". As an international award-winning cybersecurity expert and a Government cleared Ethical Hacker, Terry is known for his top-level consulting services, extensive coaching products, numerous TV appearances, and live public speaking events.

For more than 20 years, he's advised some of Canada's largest companies on internal and external security penetration prevention and remedies. As an educator, Terry's effective online comprehensive learning program, Internet Safety University (www.InternetSafetyUniversity.com), attracts more than 31,000 students from 150 countries. Developed in 2013, ISU focuses on cyber-crime, spying, security failures, Internet scams, and social networking dangers that families and individuals face every day.

In 2017, Terry was humbled after being awarded the 2017 Cybersecurity Educator of the year award; he followed that by being named to IFSEC Global's Top 20 Most Influential People in Cybersecurity for 2018, 2019 and 2020, and then, in the same year, named to the CISO Platform Global TOP 100 List.

MEDIA **COVERAGE**

- Terry Cutler introduces concept of Ethical Hacking to national audience in 2011:
- When a virus attacks computers around the world...
- Teens charged in murder plot. Terry Cutler emphasizes importance of parental monitoring:
- Keyloggers found in university computers. Mr. Cutler explains how they work:
- Are you being watched through your own security or web cam?
- How your Facebook account can be used in fraud:
- How to protect yourself against internet scams:
- Lessons in online safety must begin at home:
- How to protect your WiFi baby monitor from hackers:

INTERVIEW TOPICS

Terry Cutler has a wealth of experience providing cyber-security advice to governments, corporations, and small businesses. He has an equal (if not greater) passion for home and family computer safety. Mr. Cutler easily bridges the gap between the problems faced by organizations and individual users, making his message meaningful and accessible for readers, viewers, and listeners of all types.

Here are a few sample questions/topics to consider.

- How do the ongoing high-profile incidents of hacking relate to me as a home user?
- Is it true that “No computer is safe”?
- Is the safest thing not to use email at all?
- What can parents do to protect their children from online predators?
- Of all the people in the world, why would anyone want to hack me?
- How do private sex tapes become public?
- Are paid subscriptions to anti-virus and anti-spam programs better than the free ones?
- How do I make a good password? Is it OK to save it in my browser?
