

WISE BOTANICALS™

About the EWEJE Plant Juices

EWEJE is the Yoruba word for “plants work.” EWEJE Plant Juices are extracted from fresh wild-crafted or organically grown Equatorial African botanicals. Based on centuries-old formulations, they have been optimized by the Pharmacology Department at EKO University of Medicine and Health Sciences. They have traditionally been used to restore and promote intestinal and overall health. Wise Botanicals’ partnership with EKO University of Medicine and Health Sciences provides the ability for those who are sick to have access to the plants that work.

The following information has not been evaluated by the U.S. Food and Drug Administration. Please consult a qualified healthcare practitioner for the diagnosis and treatment of medical conditions.

ANT

EWEJE PLANT JUICE™

HIGHLIGHTS
