CREATING POSSIBILITIES IN 2021

CELEBRATING POSSIBILITY

It's a NEW year and the possibilities for navigating today are as infinite as our challenges. One of the most surprising things my clients and I have discovered during Covid-19 is the immense creativity we can tap into by being open, present, and learning new ways to connect and stay engaged with each other. Yes, we can get "zoomed out" and we can also use our creative minds along with technology to innovate, to build relationships in new ways, and create possibilities we might have never considered or thought possible before.

On **FEBRUARY 15, 2021**, from **4:30-6pm EST**, I'm offering you the gift of opportunity to celebrate possibility and new thinking. I am joined by a brilliant colleague of mine, Dr. Faye Mandell, author of the internationally acclaimed book *GPS to Self-Powerment* now published in six languages (English,

Spanish, German, Korean, French and Dutch). Join us on [ZOOM HERE](#) to explore The Self-Powerment Model. Eckhart Tolle, whose worldwide bestseller *The Power of Now*, has touched and transformed the lives of millions, said, “*Faye Mandell’s book is an important contribution to the transformation of human consciousness - a matter of greatest urgency. It shows the reader how to make the shift from thinking to awareness, from past and future to the Here – Now. An eminently practical book and powerful pointer to the truth.*”

Dr. Mandell tells us that in the present moment we have the ability to be deliberate with each experience and allow authentic and natural communication to be focused, clear, simple, resulting in extraordinary solutions to what may appear to be insolvable issues.
