

ALOHA

Humans for Humanity Coalition *presents* Health & Human Rights Summit 2021
Speaker Bios

Alison McDowell

Alison McDowell is a mother and an independent researcher in Philadelphia, Pennsylvania exposing the seamy economic underbelly of the manufactured covid-19 plandemic - and what is to come: the Fourth Industrial Revolution.

What began as an effort to slow the privatization of public education in her city evolved into an investigation of globalized poverty management, euphemistically known as social impact investing. After spending several years researching predatory educational-technologies, Alison began to dig into a new form of capitalism - biocapitalism or stakeholder capitalism, where humans are transformed into data commodities.

With the coming Fourth Industrial Revolution planned out by Klaus Schwab and the World Economic Forum, human labor is about to be replaced by artificial intelligence and robots. This creates a problem of how life can be made profitable for transnational global capital interests when the poor have no buying power and are drowning in debt.

Their solution?

Human capital bond markets, but first everyone must be tagged and trackable. That's where the biometric covid health passports come in. A future of behavior scrip tied to smart city surveillance is on the horizon.

Dr. Ben Benulis & Safe Tech Tucson

Dr. Benjamin Benulis spent the first 10 years of his career as an engineer in the semiconductor industry working for companies that designed wireless technologies many of which were precursors to 5G. Now as a doctor of chiropractic he focuses on helping people with chronic disease and chronic pain. But the 5G rollout brought him back into the tech world because of its devastating implications for human health. 5G wireless uses millimeter-length microwave radiation which is toxic to all forms of life, even at levels well below the FCC guidelines. 5G also has huge negative implications for our privacy and security as it can be used to create a massive-scale surveillance state.

Arizonans for Safe Technology and Safe Tech Tucson have been working with local governments to stop the rollout by advocating for faster, safer, secure wired technology.

Sheriff David Hathaway

Sheriff David Hathaway was born and raised in Nogales, Arizona. He is a member of a five-generation ranching family that has lived in the area since the 1800s, before Arizona statehood.

After graduating from the University of Arizona, he started his law enforcement career as a deputy sheriff with the Santa Cruz County Sheriff's Office working under Sheriffs Teyechea and Bracamonte. He then embarked on a federal law enforcement career and worked in multiple DEA offices in the U.S. and in foreign countries where he occupied various supervisory positions. His last assignment before retiring was as the head of the DEA office in Nogales.

Sheriff Hathaway works to promote the diverse cultural and economic aspects of our communities ranging from the retail businesses, the vineyards, the ranching community, the arts, the fine-dining

establishments, the produce industry, the maquiladora industry, and the tourist industry, to the many county and cross-border social events that have been a hallmark of the county and of "Ambos Nogales" for over a hundred years. He recognizes that Santa Cruz County has the largest ports of entry with Mexico of any county in Arizona and he works with government, industry, and social groups on both sides of the border to promote a strong, safe, economic and cultural relationship with Mexico. Besides preserving the safety of Santa Cruz County, he promotes it as a wonderful safe place to visit with beautiful weather and friendly people.

Sheriff Hathaway ensures that the members of the Santa Cruz County Sheriff's Office focus on the basic law enforcement goals of public safety while serving the county as public servants and peace officers. David and his wife Karen have both known each other since their public school days in Nogales. They have nine children together and several grandchildren.

Donna O'Daniel

Donna O'Daniel grew up in Arizona (Tucson and Phoenix), graduated from Carl Hayden HS, and earned her BA degree at Faith Baptist Bible College in Ankeny, Iowa. After that, she worked in secretarial positions with her latest being the Administrative Assistant to State Representatives at the Capitol in Austin, Texas. During this time, she joined The John Birch Society (JBS) becoming a Chapter Leader for several years.

In 1985, she decided to change careers, attend graduate school at the University of Texas in Austin. She graduated with an MA in Biological Sciences two years later. Her biological career led her to the Falkland Islands, Alaska, California, Oregon, Texas, Arkansas, the Northwest

Hawaiian Islands, many other Pacific Island groups, Madagascar, and Antarctica.

In 2002, she moved back to AZ for several years to help her brother care for their aging parents. Although diagnosed with MS in 2008, she was still able to volunteer part-time at various National Wildlife Refuges in Florida and Arizona until 2011. Donna rejoined The John Birch Society (JBS) in 2015 while living in Las Cruces, NM, and has been an active member ever since. She is currently a Section Leader for the JBS, overseeing some of the Chapter Leaders in AZ and NM, and currently lives in Sierra Vista, AZ.

Elana Freeland

Elana is a writer, teacher, and lecturer who researches and writes on Deep State issues. She is best known for *Chemtrails, HAARP, and the Full Spectrum Dominance of Planet Earth* (Feral House, June 2014) and *Under An Ionized Sky: From Chemtrails to Space Fence Lockdown* (Feral House, February 2018), and is now finishing *Geoengineered Transhumanism: How the Environment Has Been Weaponized by Chemicals, Electromagnetics, & Nanotechnology for Synthetic Biology* to be out late spring 2021.

Elana came of age in the eye of the Sixties maelstrom. Her 4-book series *Sub Rosa America: A Deep State History* exposes the hidden history of America since President John F. Kennedy's televised assassination. (An 80-page bibliography of some of what she read in order to write the series can be found at elanafreeland.com.) In 2017, she wrote the story "What Would Solon Have Done?" for the book *If I Were King: Advice for President Trump*, edited by Harry Blazer with an Introduction by Catherine Austin Fitts. She is still trying to escape from Olympia, Washington.

GeeGee Larrington

Geraldene Grace (GeeGee) Larrington, a native Tucsonan, is a retired pediatric occupational therapist who spent the last 22 years of her career at the Arizona State School for Deaf and Blind (2010). Concerned about children's health, she joined in the grassroots opposition to Pima County's consideration of giving a tax break to Monsanto for its greenhouse in Marana and supported Melissa Diane Smith's educational efforts about GMOs and the toxic herbicide glyphosate (RoundUp) in our foods throughout the county. Attending the Beyond Pesticides conference in Irvine, California, in 2018, GeeGee learned about, and gained special knowledge in, organic landscape management in cities, another important way to both improve health, especially children's health, and take action against Monsanto. Through her presentation, she spearheaded the effort for the City of Tucson starting an organic grass playing fields program that focuses on soil health without the use of pesticides and synthetic chemical fertilizers.

Dr. Jane Orient

“Who appointed Congressman Adam Schiff as Censor-in-Chief?” On Jan 15, 2020, the Association of American Physicians and Surgeons (AAPS), filed suit in the U.S. District Court for the District of Columbia against California Congressman Adam Schiff alleging he has abused government power and infringed free-speech rights. Under his influence, Google, Facebook, and Amazon created policies to de-platform and discredit what he asserted to be inaccurate information on vaccines. Following his March 1, 2019 press release, the media giants denied access to materials and information previously attainable. “The internet is supposed to provide free access to information to people of different opinions,” stated AAPS Executive

Director, Jane Orient, M.D.

Dr. Orient has served as the Executive Director of AAPS since 1989 and is the President of Doctors for Disaster Preparedness. She is the editor of AAPS News (), the Doctors for Disaster Preparedness Newsletter (), Civil Defense Perspectives (), and is the managing editor of the Journal of American Physicians and Surgeons (). More than 200 of her papers and op-ed pieces have been published in the scientific and popular literature on a variety of subjects including risk assessment, natural and technological hazards and nonhazards, and medical economics and ethics. She obtained her undergraduate degrees in chemistry and mathematics from the University of Arizona in Tucson and her M.D. from Columbia University College of Physicians and Surgeons in 1974. She completed an internal medicine residency at Parkland Memorial Hospital and University of Arizona Affiliated Hospitals and then became and instructor at the University of Arizona College of Medicine and a staff physician at the Tucson Veterans Administration Hospital. She is the author of YOUR Doctor is Not In: Healthy Skepticism about National Healthcare; Sutton’s Law (a novel about where the money is in medicine today); two novels on Kindle Books, Neomorts and Moonshine (where environmentalism is leading us as foreseen in the 1980s); and the second through fifth editions of Sapira’s Art and Science of Bedside Diagnosis published by Wolters Kluwer. She has been in solo private practice since 1981.

Karl Kanthak

“Is it illegal to catch measles if you want it?” Defending the personal and religious exemptions in Washington State in 2019, Karl contended, “This ‘outbreak’ was an ‘in-break.’ These people have the desire and the intent to contract natural measles for the complete and lifetime immunity it provides over the incomplete, temporary, and vaccine dependent immunity of the injection. No one caught measles who didn’t want it. There are no victims here.” Karl Kanthak is a lifelong educator and elected school board official specializing in the inaccurate data being used to restrict citizen access to both public, taxpayer supported, and private education. Mr. Kanthak’s activities include being a patient safety advocate for preventing medical errors, unnecessary treatment, and undesirable pharmaceutical interactions. Other projects include educating Health Care Providers about the identification of Fluoroquinolone Toxicity Associated Disability and Gadolinium Deposition Disease as potential causes when confronting idiopathic illnesses.

Melissa Diane Smith

Melissa Diane Smith is a Tucson-based health journalist and holistic nutritionist with more than 25 years of experience counseling clients and reporting on nutrition topics that are not covered by mainstream media that have a dramatic impact on health. She is the author of *Going Against GMOs* and *Going Against the Grain*, and the Ask the Nutritionist columnist for *Better Nutrition* magazine. In 2016-2017, she and farmer Anne Loftfield led an education campaign and grassroots movement that was successful in preventing Monsanto from receiving a tax break from Pima County.

Patrick Wood

Patrick Wood is a leading and critical expert on Sustainable Development, Green Economy, Agenda 21, 2030 Agenda and historic Technocracy. He is the author of *Technocracy Rising: The Trojan Horse of Global Transformation* (2015) and co-author of *Trilaterals Over Washington, Volumes I and II* (1978-1980) with the late Antony C. Sutton. Wood remains a leading expert on the elitist Trilateral Commission, their policies and achievements in creating their self-proclaimed “New International Economic Order” which is the essence of Sustainable Development on a global scale. An economist by education, a financial analyst and writer by profession and an American Constitutionalist by choice, Wood maintains a Biblical world view and has deep historical insights into the modern attacks on sovereignty, property rights and personal freedom. Such attacks are epitomized by the implementation of U.N. policies such as Agenda 21, Sustainable Development, Smart Growth and in education, the widespread adoption of Common Core State Standards. Wood is a frequent speaker and guest on radio shows around the nation. His current research builds on Trilateral Commission hegemony, focusing on Technocracy, Transhumanism and Scientism, and how these are transforming global economics, politics and religion.

Thomas H. Greco, Jr.

Thomas H. Greco, Jr. is a preeminent scholar, author, educator, and community economist, who, for more than 35 years, has been working at the leading edge of transformational restructuring. He is widely regarded as a leading authority on moneyless exchange systems, community currencies, financial innovation, and community economic development, and is a sought after speaker internationally. He has traveled widely in Europe, Asia, Oceania, and the Americas, lecturing, teaching, and advising. He has been a

speaker at numerous conferences and has led many workshops and colloquies in 16 countries.

He advises many community and business groups on how they can create “home-grown” means of payment (liquidity) that can save small business and put people back to work by shifting control back to local communities and compensating for the shortage of credit and official currency that banks are supposed to provide.

Having immersed himself for more than 40 years in the study of money, banking, finance, networking, innovation, and the dynamics of power, he has attained a unique body of knowledge and skills that can be of value in guiding the next wave of innovation. He avoids wearying ideological debates in preference to empirical observation and analysis, and the formulation of solutions to existing problems at the structural level rather than at the policy level which takes existing structures for granted, like, for example, the necessity of the nation state and the corporate form of organization with limited liability privilege, centralized control of money and credit, and the “natural” rate of interest, to name a few.

With an open mind and talent for critical and analytical thinking, Mr. Greco stands out from the crowd in his ability to see deeply into the nature of the global problematique and conceive new approaches and structures that can enable the emergence of a new more just, peaceful, equitable and sustainable society.

Dru Heaton, Summit Host

Reader, Thought Criminal, Sinner, Latter-day Saint, Fallen, Forgiven, Wretched, Redeemed, Human. Dru’s lifetime ambition to be categorically ignored, ostracized from friends and family, and threatened with criminal imprisonment has finally been realized. Motivated by a strong desire for humiliation, when Dru speaks, Nobody* listens. Intrigued to meet the savior of mankind, she decided to read the writings of Dr. Jonas Salk and was surprised to find he was actually a religious man. Her comments finally address the question: “How can our government agencies say it is unethical to conduct inert placebo vaccine safety studies?” *Shel Silverstein
